LUCERENT
CAPABILITY
STATEMENT

WHAT WE DO

Lucerent enables small and large organizations to conduct high quality, data-driven clinical studies in Cambodia.

We combine locally based staff with an American management team providing the optimal combination of **market expertise** and **customer service**.

OUR SERVICES

Lucerent can provide full service solutions or complement your team in the following areas:

STUDY DESIGN AND SET-UP

- Personnel recruitment and management
- Regulatory submissions and approvals
- Feasibility studies

DATA MANAGEMENT

- Site/CRA monitoring
- Data review and query resolution

PROJECT MANAGEMENT

- Site selection, contracting and training
- Patient recruitment and retention strategies
- Laboratory support services and specimen collection

We view ourselves as an extension of your project team, with the same level of accountability for successes and downfalls.

Everyone on our staff, from CEO to CRA, is ready, willing and committed to do what it takes to meet your expectations.

+

REACHING YOUR GOALS

Our local presence and expert market knowledge are your leading advantages to ensuring a successful clinical study.

While Cambodia may not possess the breadth of clinical bench experience comparable to its neighbors, with Lucerent as your local partner, Sponsor goals can be achieved, and barriers overcome.

We bridge regulatory and cultural barriers, providing unparalleled access to Key Opinion Leaders and local networks.

WHY LUCERENT?

- Quality data
- Regulatory expertise
- Access to Key Opinion Leaders
- All Clinical Research Associates are ICH GCP- certified
- Senior management with 15+ years conducting international clinical trials compliant with ICH GCP standards

OUR MISSION: TO BE THE MARKET LEADER IN PROVIDING CLINICAL TRIAL SERVICES IN CAMBODIA

CAMBODIA: A KINGDOM RIPE FOR CLINICAL TRIALS

With a population of 16.7¹ million and average GDP growth rate of 7%², Cambodia is undergoing **rapid economic development.**

Nearly 25 years after its membership into the ASEAN Economic Community (AEC), Cambodia has transformed into a country with free movement of goods, services, investment, skilled labor and freer flow of capital.

Cambodia's healthcare sector has benefited from this integration, resulting in the creation of new specialty hospitals with the required equipment and infrastructure to meet ICH GCP guidelines.

2025

SPONSOR BENEFITS

- **Rapid Patient Recruitment**
Access to treatment naïve patients with fewer trials competing for subjects and Investigators;
- **Established laboratories**
in select hospitals, including diagnostic microbiology laboratories;
- **Efficient regulatory process**
with the National Ethics Committee; study approval can sometimes be as quick as 3 months from time of submission
- **Patience Retention**
Subjects may depend on the trial for regular medical treatment. Close networks with communities where patients reside increase follow-up rates;
- **Growing pool of qualified and motivated Investigators**
who have published research in notable medical journals and understand Good Clinical Practices.

CORPORATE VISION AND MISSION

Our vision is to see positive transformation in Cambodia's healthcare system resulting in quality care and improved patient outcomes.

Our corporate mission is to be the market leader in providing clinical trial services in Cambodia.

OUR VALUES

INTEGRITY

We are honest, fair and trustworthy in all of our company activities and relationships; the way we deliver result is just as important as the results themselves

COMMITMENT TO EXCELLENCE

We do not settle for mediocrity but pursue excellence in all we do and in developing the talent we hire

PASSION FOR OUR CUSTOMERS

Our customers are our partners in creating value and we are dedicated to contributing to their success.

OUR WORK

In the past year Lucerent has proudly supported our clients in conducting oncology and infectious disease surveillance studies. Here is a snapshot of work performed to date.

PAVE – CERVICAL CANCER SCREENING

Sponsored by the United States National Cancer Institute, the HPV-Automated Visual Evaluation (PAVE) study is one of the largest consortial cervical cancer screening projects ever conducted.

The aim is to **validate a cervical screening-triage-treatment strategy** for resource-limited settings, translating our contemporary understanding of HPV natural history and cervical carcinogenesis into prevention.

សង្គមស៊ីវិល

EARLY RECOGNITION, DIAGNOSIS AND SURVEILLANCE STUDIES

- The Austere Environments Consortium for Enhanced Sepsis Outcomes (ACESO) is a prospective observational cohort study of adult patients with suspected sepsis in Cambodia. The study has been enrolling patients since 2014 at a provincial hospital with the aim to improve early recognition, diagnosis and effective treatment of severe sepsis from all causes.
- Surveillance and Etiology of Acute Undifferentiated Febrile Illnesses in Cambodia
- Acute Disease among Village Cohorts in Kampong Cham Province
